
**APPENDIX 2 – SCOPING LETTERS FROM SHPO AND STATE
ENGINEER’S OFFICE**

Aug. 15, 2001

COPY

Mr. Iobst
Acting Supervisor
Grand Teton National Park
P.O. Drawer 170
Moose, WY 83012

re: Jenny Lake Lodge Improvements (SHPO File # 0801CLH025)

Dear Mr. Iobst:

Christi Hutchison of our staff has received information concerning the aforementioned project. Thank you for allowing us the opportunity to comment.

We have reviewed the project report and find the documentation meets the Secretary of the Interior's Standards for Archaeology and Historic Preservation (48 FR 44716-42). No sites meeting the criteria of eligibility for listing in the National Register of Historic Places will be affected by the project as planned. We recommend the National Park Service (NPS) allow the project to proceed in accordance with state and federal laws subject to the following stipulation: if any cultural materials are discovered during construction, work in the area should halt immediately and the NPS staff and SHPO staff must be contacted. Work in the area may not resume until the materials have been evaluated and adequate measures for their protection have been taken.

This letter should be retained in your files as documentation of our determination that no historic properties will be affected by this project.

Please refer to the SHPO file #0801CLH025 on any future correspondence dealing with this project. If you have any questions, contact Christi Hutchison at 307-777-6694 or me at 307-777-6311.

Sincerely,

Judy K. Wolf
Review and Compliance Program Manager

RE: Jenny Lake Lodge Complex Renovation and Construction (State
ID No. 2001-129)

Dear Mr. Reese:

A review of our records shows only one water right (P19705D, copy attached) in the development area and this is for only 25gpm. This does not appear to be adequate for the size of the development. Water right permits are required for any surface or groundwater sources being used at the Lodge complex. If more water than is permitted is being used, an enlargement of the existing permit and/or new permits will be required to put this in order. The application forms can be obtained from our office.

If you, the Grand Teton Lodge Company or the Park Service should have any questions concerning this matter, please feel free to contact our Surface Water and Groundwater Sections at the numbers listed below.

Sincerely,

David S. Benner
